

About Us

At SUKI, we handpick each product, ensuring it meets our high standards for quality, sustainability, and ethical sourcing. Our mission is to offer everyone something they'll truly cherish, products that empower them to demonstrate their commitment to the environment and genuinely make a difference. Whether it's food, reusable essentials for the home, earth-friendly tableware, or uplifting everyday items, we cater to a broad range of interests and lifestyles. Because each individual is unique, we believe they deserve the most extraordinary eco-friendly products available anywhere.

Process of Areca leaf products

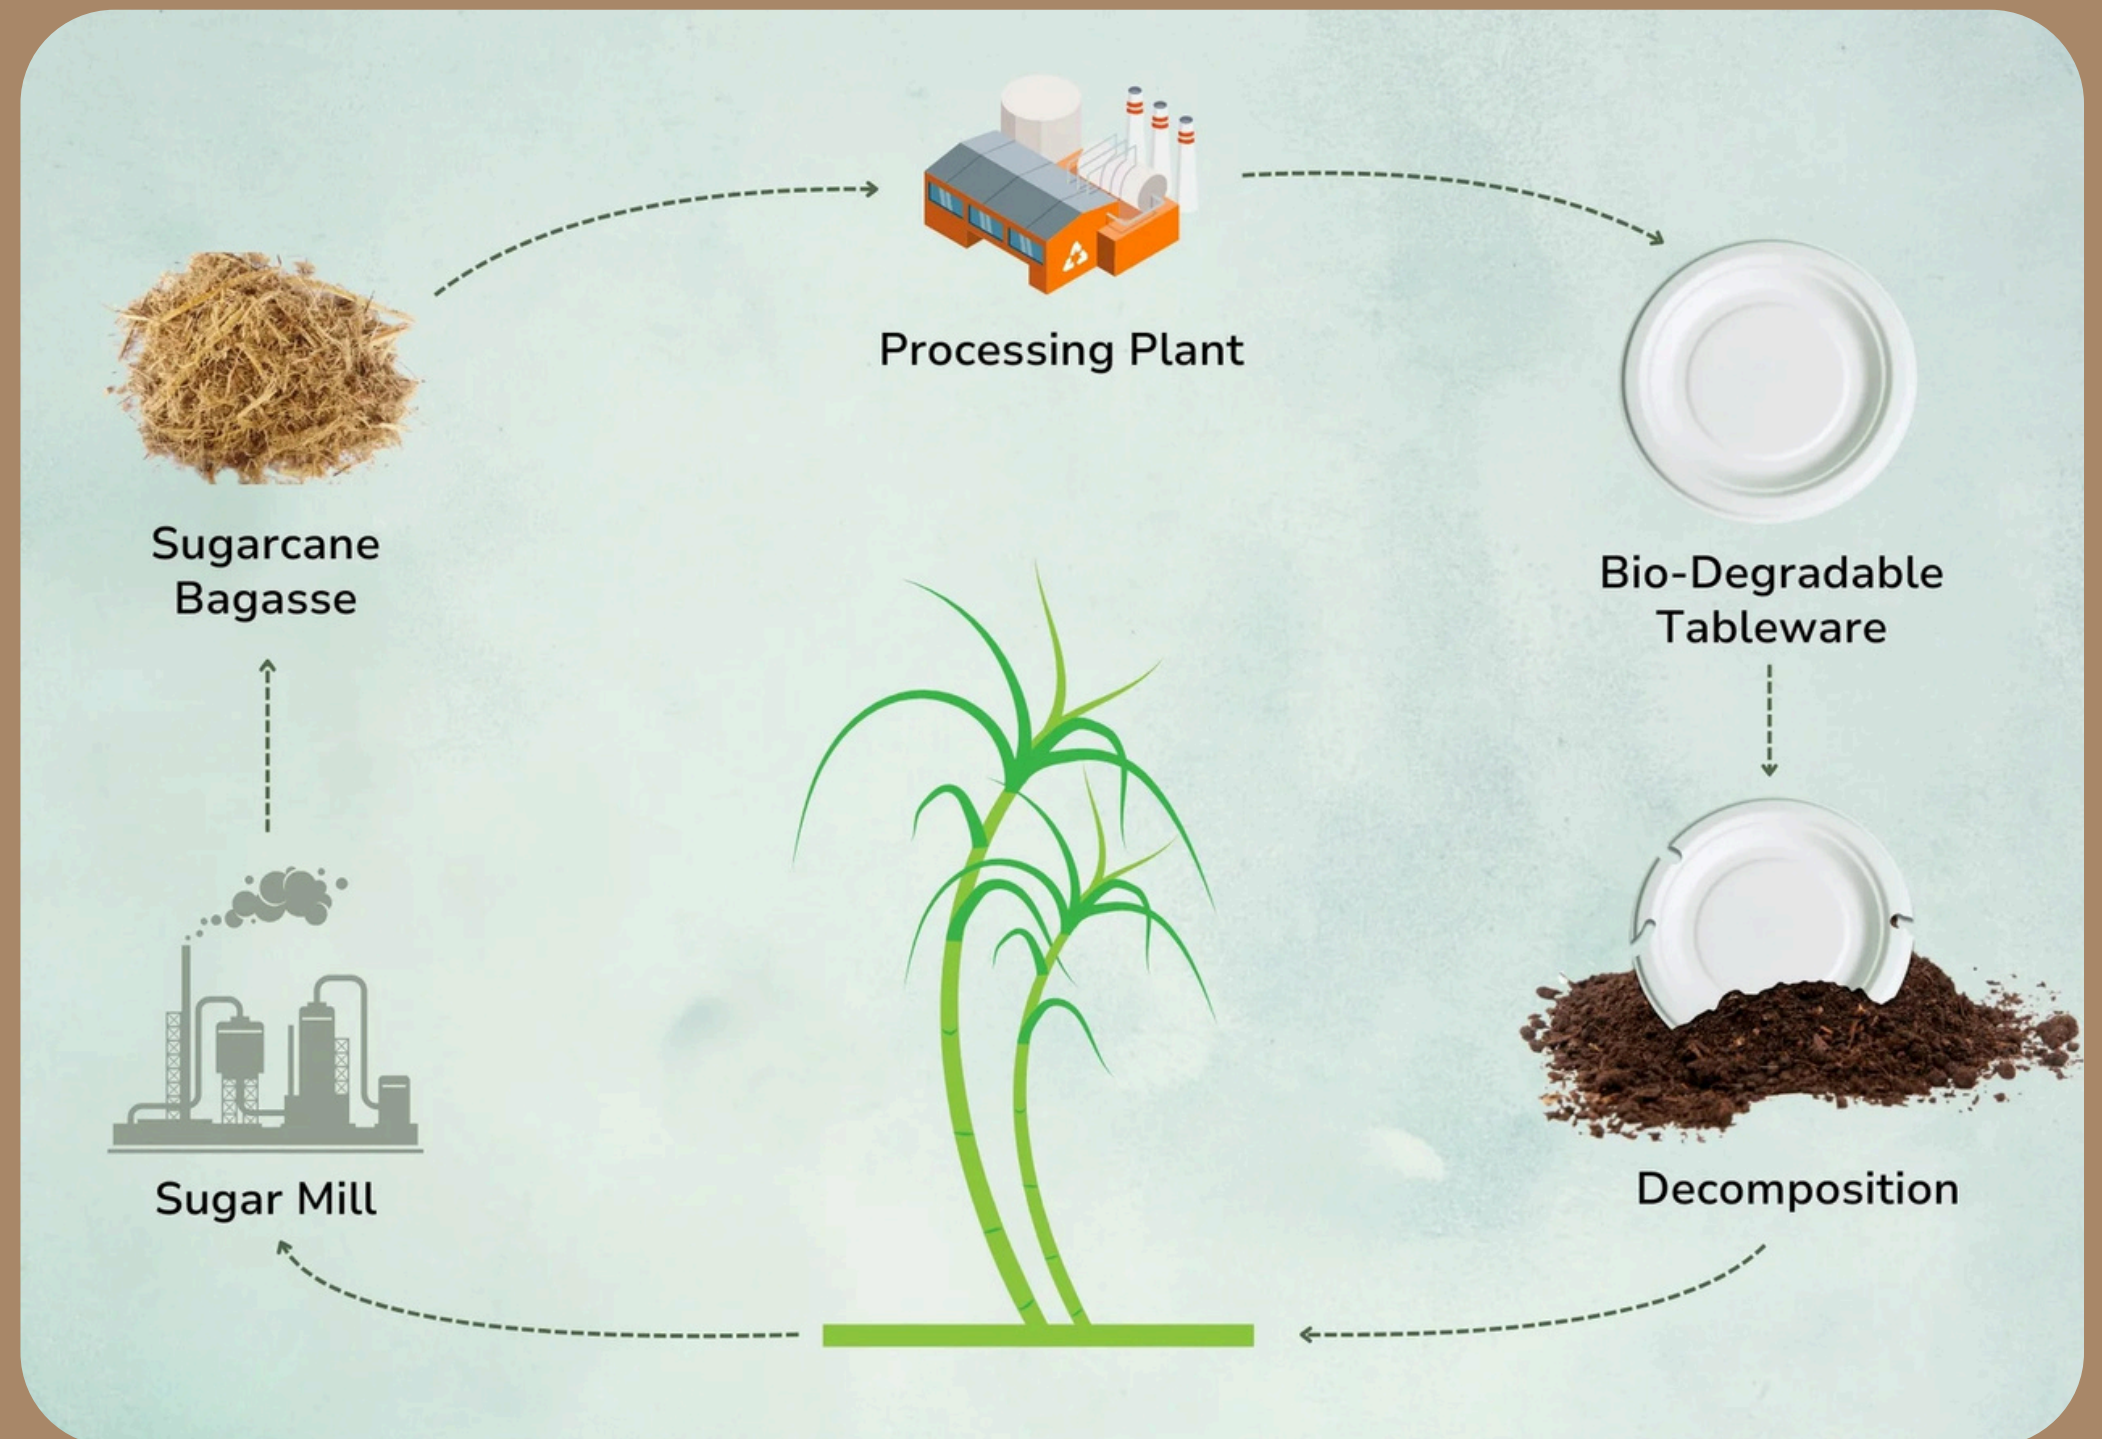

At SUKI, We work with Areca Nut tableware, Paper products, Sugar Bagasse Products, and here's a small representation of Areca leaf tableware products preparation cycle.

We source our eco-friendly tableware from ethical, reliable manufacturers and craft every piece from cleaned, pressed palm sheaths—completely natural and sustainable.

Process of Sugarcane Bagasse Products

What makes sugarcane bagasse popular in food packaging?
Sugarcane bagasse is a 100% biodegradable, compostable, and chemical-free tableware alternative that supports the “green living” initiative to save the planet. From manufacturing to usage, sugarcane pulp products are completely wastage-free. All the residual components of sugarcane plants, such as bagasse ash, bagasse, and molasses are used for different purposes.

PRODUCT USP

- Anti-leak design with superior locking mechanism
- Lightweight yet super sturdy and durable
- No aroma exchange
- No harmful chemical leaching as in plastic products
- Unique design, multiple shapes, compartments and sizes
- Our products are microwaveable & freezable
